Projects

1. *Fusion Store - Shopping Cart Application* March 2023 - April 2023

Html, Css, JavaScript and ReactJs

- Developed an application for Shopping Cart using Html , Css and JavaScript to build interactive and responsive user interfaces.
- Integrated functionality to handle changes in the quantity of items within the shopping cart, allowing users to add or subtract items. Utilized ReactJS to calculate the total price of the items in the shopping cart in real-time, providing users with an accurate cost summary
- *Keywords: Add or subtract items , Total price Calculation , Cost Summary*

2. *Task Master - To Do List Application* January 2023 - March 2023

Html, Css, Python, Flask

- Designed an intuitive and user-friendly interface for the Todo list application, ensuring an easy and efficient task management experience.
- Implemented full CRUD functionality, allowing users to create new tasks, view existing tasks, update task details, and delete tasks from the Todo list.
- *Keywords: Efficient Task Management , Full CRUD functionality.*

3. *Spotify Clone - Music Streaming Web Application* January 2023 - March 2023

Html , Css and JavaScript

- Spotify clone built using Html, Css, and JavaScript. Mention that it replicates some of Spotify's core features and functionalities.
- Specific features you implemented, such as music play , pause , playnext etc. .
- *Keywords: JavaScript, Play and Media control*
